

RECYCLING ALUMINUM CANS IS GOOD BUSINESS FOR DELAWARE

ALUMINUM CANS ARE A TRULY SUSTAINABLE PRODUCT

TODAY, **DELAWARE** RECYCLES **36%** OF ALUMINUM CANS.* INCREASING THE RECYCLING RATE TO **90%** WOULD OFFER SIGNIFICANT ECONOMIC, SOCIAL, AND CLIMATE BENEFITS:

ECONOMIC & SOCIAL BENEFITS

Generate **\$4.5 million** for Delaware's economy through material sales

Contribute **280 jobs** in collection, sorting, and reprocessing to Delaware's economy

Raise wages in related industries in Delaware from **\$5.5 million to \$13.3 million**

CLIMATE BENEFITS

Keep **3,500 tons of materials** out of the landfill each year

Save enough energy to power **4,000 homes** for a year

Avoid **32,300 MTCO_{2e}** of GHG emissions annually — equivalent to taking **7,000 cars** off the road for a year

MORE ALUMINUM CANS RECYCLED = LESS RELIANCE ON IMPORTS OF RECYCLED MATERIAL

If more cans are recycled...

we could rely less on primary aluminum imports...

and increase recycled content **beyond 73%**.

*Recycling rates reflect material losses during collection and sorting. Recycling metrics are from the 50 States of Recycling report.
