

# RECYCLING ALUMINUM CANS IS GOOD BUSINESS FOR IOWA

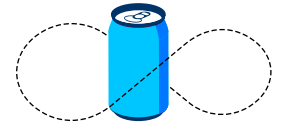

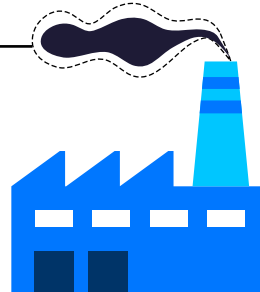

## ALUMINUM CANS ARE A TRULY SUSTAINABLE PRODUCT

Recycled aluminum uses **92% less energy** than virgin

A **10% increase** in recycled content decreases greenhouse gas (GHG) emissions **by 15%**

Unlike most other packaging materials aluminum is **infinitely recyclable**

TODAY, IOWA RECYCLES **76%** OF ALUMINUM CANS.\* INCREASING THE RECYCLING RATE TO **90%** WOULD OFFER SIGNIFICANT ECONOMIC, SOCIAL, AND CLIMATE BENEFITS:

### ECONOMIC & SOCIAL BENEFITS

Generate **\$21.7 million** for Iowa's economy through material sales

Contribute **1,300 jobs** in collection, sorting, and reprocessing to Iowa's economy

Raise wages in related industries in Iowa from **\$54.3 million to \$64.4 million**

### CLIMATE BENEFITS

Keep **17,100 tons of materials** out of the landfill each year

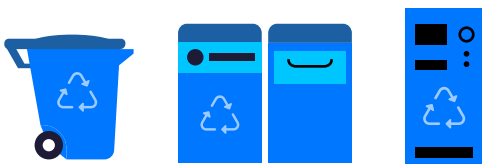

Save enough energy to power **19,000 homes** for a year

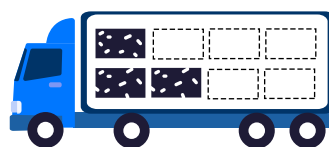

Avoid **156,000 MTCO2e** of GHG emissions annually — equivalent to taking **34,000 cars** off the road for a year

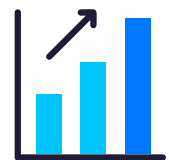

## MORE ALUMINUM CANS RECYCLED = LESS RELIANCE ON IMPORTS OF RECYCLED MATERIAL

If more cans are recycled...

we could rely less on primary aluminum imports...

and increase recycled content **beyond 73%**.

\*Recycling rates reflect material losses during collection and sorting. Recycling metrics are from the 50 States of Recycling report.
