

RECYCLING ALUMINUM CANS IS GOOD BUSINESS FOR OHIO

ALUMINUM CANS ARE A TRULY SUSTAINABLE PRODUCT

TODAY, OHIO RECYCLES **16%** OF ALUMINUM CANS.* INCREASING THE RECYCLING RATE TO **90%** WOULD OFFER SIGNIFICANT ECONOMIC, SOCIAL, AND CLIMATE BENEFITS:

ECONOMIC & SOCIAL BENEFITS

- Generate **\$56 million** for Ohio's economy through material sales
- Contribute **3,500 jobs** in collection, sorting, and reprocessing to Ohio's economy
- Raise wages in related industries in Ohio from **\$31.3 million to \$168 million**

CLIMATE BENEFITS

- Keep **44,200 tons of materials** out of the landfill each year
- Save enough energy to power **49,000 homes** for a year
- Avoid **403,700 MTCO_{2e}** of GHG emissions annually — equivalent to taking **88,000 cars** off the road for a year

MORE ALUMINUM CANS RECYCLED = LESS RELIANCE ON IMPORTS OF RECYCLED MATERIAL

If more cans are recycled...

we could rely less on primary aluminum imports...

and increase recycled content **beyond 73%**.

*Recycling rates reflect material losses during collection and sorting. Recycling metrics are from the 50 States of Recycling report.
